Barn 154 Show Home

At 154m² this spacious, beautifully appointed house has all the features you've come to expect in a design and quality focused Elevate home. The open plan living and dining area boasts a 5.5m over wall stacker door allowing seamless indoor/outdoor flow, with the stacker door opposite, further promoting the illusion of bringing the outdoors in.

A considered design maximizes internal space, creating a sense of openness, enhancing light, and minimising wasted areas. Throughout the home, cleverly designed nooks and features include a 'hidden' scullery and laundry, a custom-made dining table, a quiet office alcove, and an in-built entertainment wall that blends style with storage. These ingenious space-savers take this home to next level style and functionality.

The raked ceiling, in the main living area, adds architectural drama and enhances the sense of volume and space. The over-height ceiling, internal doors, and floor-to-ceiling cabinetry also add to the spacious feel of the interiors.

Commercial grade laminate flooring is used throughout, with premium carpet in the bedrooms and the snug to add warmth and elegance, and the enviable ensuite and bathroom are fitted with a superior quality range of bathroom and tapware.

The house is designed for a very high wind zone and is clad in a contemporary mix of Oblique Weatherboard paired with sustainably grown Western Red Cedar.

To experience the next generation of high-end prebuilt homes, arrange your show home visit today.

NOTE: The Barn 154 show home includes some upgrades and additions to the standard Elevate 154 home. Contact Elevate Homes or visit www.elevatehomes.co.nz for a standard specification list.
